OBA Group

The Biggest Pasta Producer of **TURKEY**

OBA Makarnacılık San. ve Tic. A.Ş. Founded in Gaziantep in 1966 is an industry-leading company with its technological investments and quality production attaching importance to human health. Acquired by ÖZGÜÇLÜ FAMILY in 2005, OBA makes production in facilities with an open area of 110.000 m2 and a closed area of 65.000 m2 in Gaziantep 4th Organized Industrial Area with the latest Italian technology above world standards.

Following the investments with the amount of 50,000,000 Euro in 2010 and 2012, it became the largest company in the industry by being the 1st in Turkey and 2nd in the world in terms of 1.500 tons wheat crushing per day and 1.500 tons/day pasta production. The brand of Oba is in the shelves of 90 countries including mainly Turkey, Africa, Middle East, Far East market and Britain, Germany, China, South Korea, India. Oba Makarna offering 40 different types of products to its consumers by using the 100% hard durum wheat grown in the fertile lands of Southeastern Anatolia Region provides service with laboratory analysis equipped with the most advanced control devices untouched by human hands in integrated modern production facilities.

Sakarya

The selection of raw materials is performed by considering the all kinds of factors (wheat type, weather conditions, soil type, and environmental impact in production) that will affect the product quality by experienced team. It promises the same quality for each product in every country with samples taken from the production batch, analyzes, product traceability and periodic quality meetings.

Our new facility, which is installed on 55 thousand square meters open area and has 25 thousand square meters of closed area, is very close to the Marmara and Aegean regions where the population density is the highest. Admission to the facilities in Sakarya, which is close to both the port and the inner market, we will have an important advantage in transportation for the Marmara and Aegean regions. By adding 25 Million Euros to the newly purchased facility, Oba Pasta will be operating 2000 tons pasta production capacity per day. Having a production capacity of 200 tons of flour per day, OBA, which has stepped into the flour sector, the world's most strategic product, we will meet with the producers of packaged and bulk products on the market.

Gaziantep

Management

As OBA Makama, we are working to make effective our competitive advantages by intertwining our strong and innovative perception with international collaborations. We are a leading company in the global market with the added value we generate through our international collaborations and the employment we create.

Believing in the future of this country, we prioritize creating maximum benefits to our employees and business partners as a reputable company in the sector, since the day we started business, and we are well on our way to be the first choice of our customers, business partners and employees within the direction of our vision.

Always targeting "sustainability" in our long-term strategies, "While we are proud to be the biggest pasta production plant in our country, We work hard to increase macaroni consumption in our country as well as on significant R&D projects to provide benefits to our people."

We will give more responsibilities and provide more important roles to younger employees in the management of OBA, which is apace on its way to institutionalization, and we believe we will see better days with their innovative and creative works.

We will increase our market share in the growing and developing world economy and continue our business through a rapid, healthy and sustainable growth strategy. We will continue our business activities with the ambition to carry the reputation of country further in the international arena through our international investments, as we provide contribution to the development of Turkish economy.

Yours sincerely,

Mr. Musa ÖZGÜÇLÜ
President of the Board

Mr. Alpaslan ÖZGÜÇLÜ
General Manager & CEO
